About This Game

Times are changing, and the existence of the Grimoas has become less relevant in everyday life. The young Eil is in the middle of his Coming-of-Age ceremony when suddenly his town is attacked by a demon and engulfed in flames. In the midst of this confusion, Eil enters into a pact with the Air Grimoa, Nogard, in order to save everyone. Eil and Nogard set off to look for the demon who cast the town into a sea of flames, and to find other Grimoas in order to put a stop to its violence!

The game features classic turn-based battles, with a Synchro Gauge system which lets you unleash powerful skills when synchronized with the Grimoas. A wide range of achievements, including quests to complete and items to collect, await you during this epic adventure!

This app features partial controller support with the Xbox 360 Controller on Windows.

Sorry, not recommended. There's no fun and there is really really no challenge... Why has level 25 absolutely the same speed like level 1? oO Not a single difference between the levels besides the color.. A fun little VR homage to arcade space shooters like Freespace 2 and X-Wing

+1 for making the joystick controls easy to setup

. Would have loved to have kept playing, but you start a "shift" you then have about 5 minutes before it's over (regardless of what you do), and another minute to get back to your bed before you fall asleep and have a nightmare, rinse and repeat. Like many others have said, this game could be so much better if the developer was at all interested in refining the game, but they don't give that impression in fact it doesn't look like the developer has visited the forums in the last 8 months.

The deciding factor.. the control scheme just doesnt feel natural on a mouse and keyboard. I am picking up video tapes and have no idea what to do with them. Open ended puzzles reset themselves as you attempt to solve them unless you choose the hidden, correct path with no mistakes.. One ugly m\u0435\u2665\u2665\u2665\u2665er. This review I'm writing slightly ahead of when I normally would primarily since I'm doing this game single player, and this game is VERY HARD single player. This game is very obviously designed with multiplayer in mind. And the levels and difficulty reflect that. This is a game I highly recommend to play if you have a few friends over, but not really if you are on your own.. i really like it but the music drives me insane, can't play longer than 5 minutes...no option to turn it off, or i just can't find it.. Interesting and new gameplay here; it's different in a good way. Just give the demo a try; it's a neat little game. Cheap, too.

Every last bit of me is embarrassed I finished this game. Still the best day of my life.. 5,000 achievements in less than 2 minutes. Very nice.. I have play this so many times that I had to buy the Steam Complete edition. I tend to start in 1936 and have played every major power, but also some of the minor powers. Want to conquer Europe as Spain? Maybe the Americas as Argentina? Loads of replayability and much easier to get to grips with than HoI3.. After being excited about Axes & Acres (~120 hours) and Solar Settlers (~50 hours and still going), I really wanted to support this developer more. I also already had Minos Strategos but that's not really my thing although it's a good game.

So I bought all of his games that I didn't already have, just to support him. I didn't really expect much from this game.

But I was wrong. This game is really good! I agree that the concept is a little bit weird and it takes some time to understand how it works, but it has a fun and challenging concept.

In short: you are a captain of several sky ships/boats and the sky has cities that buy stuff that can be found everywhere if you look closely enough. By looking closely enough, I mean that things spawn there on specific occasions. You can sell goods for a specific price (changes every turn) or sell three of the same goods for a fixed contract price. The hard part is getting around this map: you only have little fuel, not at all enough to just fly around the map and that's where wind magic comes into play. Every good has a special magical power that generates a trail of wind which you will follow if you get onto it... but also if you don't want it, you will travel with that wind. You can override specific winds with new wind magic. It's a fuel saver.

You have a limited amount of turns in which you have to sell enough to get the required number of victory points.

The game is a bit weird in the beginning, but it's certainly fun and challenging!. A simple, but very interesting and addictive game. I did not expect to like it so much :-)
